

Data Sources:

HMA compiled data from various sources and used Tableau, a data visualization software, to create interactive maps of the data. The California Department of Public Health already provides a robust Opioid Overdose Surveillance Dashboard (linked below) and this data dashboard was intended to complement that valuable public resource.

The data included in this dashboard comes from the following sources:

- [California Department of Public Health Opioid Overdose Surveillance Dashboard](#)
- [California Department of Health Care Services \(DHCS\)](#)
- [The California Opioid Safety Network](#)
- [Health Resources and Services Administration \(HRSA\) Health Center Program Awardee Data](#)
- [Uniform Data System \(UDS\)](#)
- [California Primary Care Association \(CPCA\)](#)
- [Substance Abuse and Mental Health Services Administration \(SAMHSA\) Opioid Treatment Program \(OTP\) Directory](#)
- [American Hospital Association \(AHA\)](#)
- [United States Census Bureau American Community Survey 5-year Estimates](#)
- [United States Drug Enforcement Administration \(DEA\)](#)
